About carpet tiles

Carpet tiles are specially designed squares of carpeting that are made to lockdown in a similar way to standard carpet flooring. Some of the tiles adhere to the floors using glues, while others are nailed or stapled down. This carpet flooring option is designed to go down easily, and it's often used with different colors blended together in checker or mosaic patterns to create more unique looks. While not everyone likes the look of carpet tiles, it's a strong type of carpet flooring that's coming back in style today.

Advantage of Carpet Tiles

If you're looking for a quick and easy to install type of carpet flooring, tiles are the perfect way to go. When it comes to carpet installation, tiles are one of the best products on the market. They go down very quickly and easily and are designed for simplicity. Since carpet flooring tiles are designed to be small in size, they are easy to carry and to position wherever they are needed. This is much simpler than carrying around large rolls of roll-out carpet varieties. Carpet tiles go down faster during carpet installation than other carpet flooring types as well, and it doesn't take as much skill to ensure that the floor looks smooth and even.

- Cost and time savings
- Simple and fast installation:
- Extremely durable:
- Easy to maintain:
- Huge options:

Creative Spark

CS811 RED

CS812 YELLOW
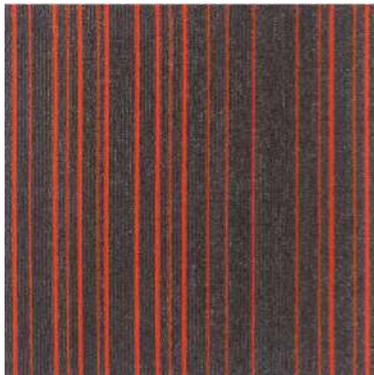

CS813 ORANGE
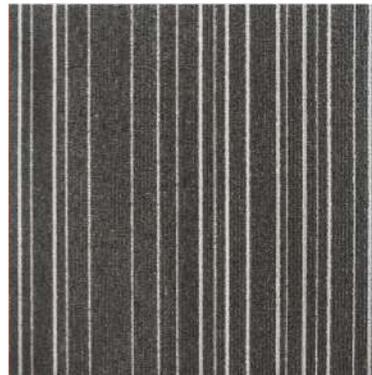

CS814 WHITE

Technical Specification	
Style Name	**CREATIVE SPARK**
Construction	Multi-Level Loop
Yarn Type	100% BCF Polypropylene
Dye Method	Solution Dye
Machine Gauge	1/10 th
Pile Height (±5%)	3.0 mm
Tufted Pile Weight (±5%)	500 gsm
Total Thickness (±5%)	5.50 mm
Backing Type	Cushion
Tile Size	50cm x 50cm
Tile per box	20 pcs
Area per box	05 m^2

Performance Specification	
Static propensity (Anti-Static)	Passes
Flammability	Passes
